

I do not believe that existing FM-Translator based stations should be subverted by LPFM priorities. In particular, stations such as K-LOVE (106.7 FM in Raleigh, NC area) provides a service not being met by local providers today, nor in the 7 years prior that I have lived in this area. Local small-market populations may not benefit from the variety of options afforded to larger markets, unless it is provided by national or regional services such as K-LOVE. Thank you.
